## Career break

After my doctorat, 04/2014 - 07/2016, I worked full time for the non-governmental organization “Teach First Deutschland” that focusses on schools in socially troubled areas within Germany. (Similar programs include Teach for America, Teach First UK, Le Choix de l'école.) I taught mathematics, German language skills for young refugees, and built cooperations with external partners in career orientation and for supporting children with learning difficulties
